

My name is Jose A. Serrano, I am a flight attendant for American Eagle. I received an e-mail from the AFA (Association of Flights Attendants) in which they informed the members about the proposal of letting passengers using cell phones during flights.

I still don't understand why such a proposal will be consider, this is why:

- 1) most passengers don't pay attention to PA's (passenger announcements) from the inflight crew (flight attendants, pilots) because they are involved in conversations over cell phones.
- 2) most passengers don't pay attention during safety demos because of the use of cell phones.
- 3) after september 11th, safety is supposed to be the main concern among travelers.
- 4) nobody needs to listen to your personal converstions, or business deals, period.

This are only some of the reasons why I am begging you not to pass this insane proposal.

Remember, safety should be our main concern ...

Thank you,

Jose A. Serrano  
Flight Attendant, American Eagle Airlines
